

FUNDRAISING GOAL:

\$25,000 for improved Access to Quality Education, Diagnosis, Support and Treatment of Coronary Vascular Disease, Diabetes, and Chronic Kidney Disease.

SUPPORT THE WELLNESS CHALLENGE TODAY!

YOUR CONTRIBUTION WILL EXTEND SUPPORT FOR:

Coronary Vascular Disease (Cardiac Care)

From the moment you enter our Emergency Department, throughout your hospitalization, and even after you are discharged, The Kingston Hospital Cardiology Department is ready to care for you. We utilize the latest technology to treat Coronary Vascular Disease, no matter how it manifests itself.

Diabetes

The Kingston Hospital has established a comprehensive diabetes education program whose goal is to identify those with this disease and provide the community with a resource center where they can obtain information and continuing support to help manage their diabetes.

Chronic Kidney Disease

The Kingston Hospital Dialysis Center provides assessment, diagnosis, treatment and evaluation of the health needs of patients with acute and chronic renal failure. The Center provides comprehensive nephrology care for our adult and geriatric population. We offer both outpatient, as well as inpatient dialysis for the acutely ill in the hospital.

IMPROVE YOUR PERSONAL HEALTH - JOIN US!
